I have documents stored in Box. Please note that this file contains a TEST BANK ONLY. The company says that it does not change the resolution of photos when they're downloaded, but that it relies on the API of the social site itself. For more information on LMS compatibility, see . To import the package into D2L, use the "Import/Export/Copy components" function under "Edit Course." Here are the instructions D2L offers for this task: ♦ You may want to ask your institution's IT department/departmental LMS liaison for assistance, since D2L instances vary somewhat from institution to institution. I have spreadsheets stored in Google Docs. Or I could just turn to SocialFolders, a service that offers an idea that's so simple-it syncs the content you have on your social sites to your desktop-I have to wonder why someone didn't think of it before. The QTI format can be used by a variety of learning management systems (including Canvas and Moodle). -Liane Cassavoy Please login to view purchased products or purchase new ones. It also lets you access your friends' photos and files (as long as their privacy settings allow you to do so), and to create an offline copy of these documents, too. For example, SocialFolders uses Facebook's default upload API, which can reduce photo resolution. Which is great-until I want access to these files when I'm offline. Figures | Figure PowerPoints | Lecture PowerPoints | Test Bank | Hands on Problems | Analyzing Data Companion Exercises Please login to view purchased products or purchase new ones. SocialFolders supports Box, Evernote, Facebook, Flickr, Google Docs, Instagram, Photobucket, Picasa, SmugMug, Twitter, and YouTube. Subfolders for each of your connected services will automatically be created there, too. SocialFolders does more than just create a backup of your files. You can use SocialFolders's Web interface to determine how much information you'd like access to (all of your Facebook albums, or only a select few, for example), and the content you've chosen will be automatically downloaded to your desktop. This file is designed to be imported directly into Blackboard and is not designed to be readable with the regular programs on your computer. Figures | Figure PowerPoints | Lecture PowerPoints | Test Bank | Hands on Problems | Analyzing Data Companion Exercises Please login to view purchased products or purchase new ones. You will need to make sure you have the storage to spare, though, as some of these files could takeup plenty of disk space. At a GlanceWorks in the backgroundSimple to useSome photos were low-resSome photos were low resSocialFolders makes it easy to create offline copies of your online data. And I have videos stored on YouTube. (The free version of SocialFolders limits you to three services and 2,000 files; a Premium account, which costs \$10 per year, is unlimited.) SocialFolders organizes your Facebook photos into folders that correspond with your album names, and photo titles that correspond to your captions.Once you've connected SocialFolders to your social services, icons for each of them will appear in the SocialFolders folder that's been created on your computer. Minor issue with photo resolution aside, I was quite impressed with SocialFolders. SocialFolders is both an application and a Web service: You download a component to your desktop, which creates a SocialFolders folder that you can access via Windows Explorer. I did notice that some of the photos that SocialFolders downloaded for me looked to be slightly lower res than they appeared when viewed on Facebook, though. The company does note that most of the photo-sharing sites it supports lets users download photos in full resolution, though. You simply create a folder in the SocialFolders directory on your desktop, and its contents will be automatically synced to your account. To import the package into Blackboard, use the "Import Package" function under "Packages and Utilities." Here are the instructions Blackboard offers for this task: ♦ You may want to ask your institution's IT department/departmental LMS liaison for assistance, since Blackboard instances vary from institution to institution. SocialFolders is not only limited to downloads: It lets you upload files to your social sites, too. This file is designed to be imported directly into D2L and is not designed to be readable with the regular programs on your computer. I could go to each site and download all of my files until I've amassed an offline collection of my stuff. Then you head to socialfolders.me, where you create an account and start connecting your social services. It offers a free and easy way to make sure you always have a backup of your precious online data. I have photos stored on Facebook. I found this a very handy way to grab photos of my nieces and nephews that my siblings share on Facebook.
